Director of Life Home Project Foundation: Mr. Noppadol Pongpan

2. Project Funding Provided by: HeadStart International School Chaofah City Campus

3. Date Funding Received: 24 April 2026, Total Amount Received: 355,700.55 Baht

4. Project Rationale and Background

Life Home Project Foundation has been operating since 2001. The Foundation began constructing buildings and facilities in 2005 and has since developed a total of nine buildings. These facilities have now been in use for more than 21 years and were established to provide accommodation, care, and support for women and children in vulnerable situations.

The Foundation's primary mission is to provide assistance and care for vulnerable and socially disadvantaged children, including children and women affected by HIV/AIDS, as well as individuals experiencing social difficulties and hardship resulting from family problems, violence, and other circumstances that negatively affect their daily lives.

The Foundation provides accommodation and care to ensure that those under its care have a safe living environment, receive appropriate support, and have opportunities to improve their quality of life and develop in a suitable and supportive environment.

Following a period during which the Foundation temporarily suspended its operations due to the global COVID-19 pandemic, the Foundation experienced significant financial challenges that affected its ability to maintain its operations. Like many organizations and sectors, the Foundation was affected by the widespread impact of the pandemic.

The Foundation has now resumed its operations under a new Board of Directors, led by Ms. Urai Samakkarn as Chairperson. The new Board recognized the importance of reopening the Foundation and continuing to provide assistance to the same target groups who remain in need of support.

Following an assessment of the existing buildings and facilities, it was found that the main structures remain in good condition, with stable and strong foundations. However, after many years of use, the interior and exterior areas have deteriorated considerably.

In particular, the sewage and sanitation systems in several buildings are no longer in satisfactory condition. There is an urgent need to repair and improve these systems and other affected areas so that the facilities can be restored to a safe and functional condition as soon as possible.

These improvements are necessary to enable the Foundation to resume the proper use of its facilities and to accommodate the increasing number of children under its care. The project will directly benefit the children by providing a safer, more suitable, and healthier living environment and will help ensure that the Foundation can continue providing essential care and support to vulnerable children and contributing to the wider community.

5. Project Objectives

The objective of this project is to provide vulnerable children with appropriate care in accordance with basic standards of childcare by developing, repairing, and improving the buildings and facilities used for their care.

The project includes the renovation and improvement of sleeping areas in three children's residential buildings, the development of a children's activity area, the repair and improvement of bathrooms in all buildings, and the repair and improvement of the sewage and sanitation systems to ensure that they are safe, functional, and suitable for daily use.

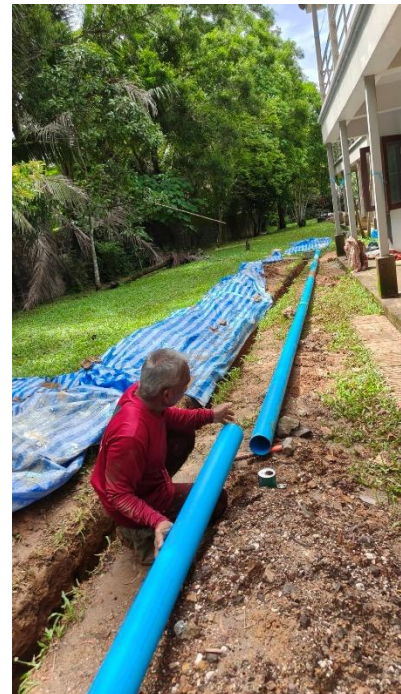

In addition, the project provides lunch support for 20 children under the care of the Life Home Project Foundation Children's Home.

6. Details of Urgent Repair and Renovation Work Required for the Foundation's Operations

- a. Building A: Excavation work was carried out and a new drainage pipe system was installed to identify and resolve the issues of blocked drains and water overflow in the bathrooms.

- b. Building B : Excavation work was carried out and a new drainage pipe system was installed to identify and resolve the issues of blocked drains and water overflow in the bathrooms.

- c. Building C: Excavation work was carried out and a new drainage pipe system was installed to identify and resolve the issues of blocked drains and water overflow in the bathrooms.

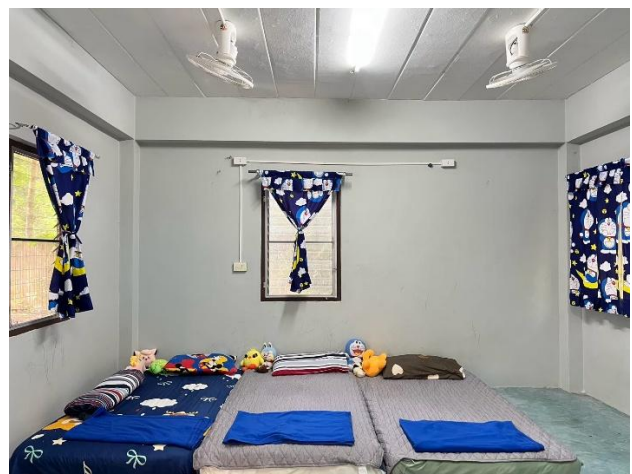

- d. Repair and Renovation of Bathrooms in All Three Buildings: Buildings A, B, and C

- e. Improvement of the children's bedrooms, including the installation of window screens, curtain rods and curtains, as well as the purchase of wardrobes.

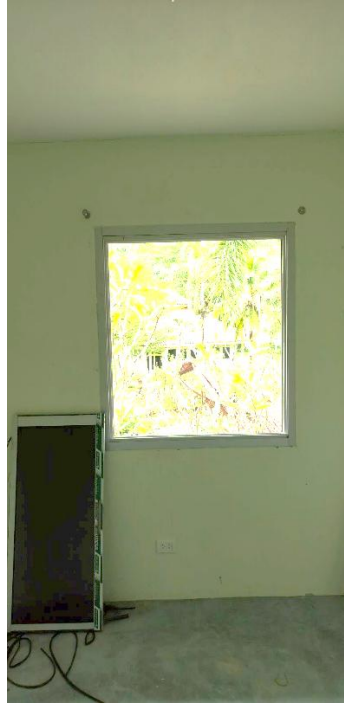

- f. Installation of six aluminum-framed glass panels, along with the installation of wall-mounted and ceiling fans.

g. Improvement of the multipurpose activity area for children's activities.

- h. Installation of five clothes-drying racks, two motors and Dry-run protection for the water pump.

- i. Renovation of Building C, including the installation of a new electrical system, interior repainting, installation of doors and door handles, installation of aluminum-framed windows, bathroom repairs, and improvement of the sewage and sanitation system.

- j. Construction of a safety fence around the pond, using a combination of funding from this project and contributions from other funding sources.

- k. Establishment of a first-aid room, using a combination of funding from this project and contributions from other funding sources.

1. A portion of the budget will be used to cover lunch expenses for the children.

7. Future Planned Activities Include:

a. Vehicle Fundraising Project

Develop a fundraising project to purchase a vehicle for transporting children to and from school, as well as for essential travel related to medical appointments, educational activities, and other necessary services.

b. Classroom and Computer Room Development Project

Develop and construct additional classrooms and a computer room to provide children with a suitable learning environment, support their educational development, and enhance their digital and technology skills.

c. Children's Sandpit Development Project

Construct a safe and suitable sandpit area for the children to encourage recreational activities, creativity, social interaction, and age-appropriate learning through play.

Acknowledgement and Project Summary

Life Home Project Foundation has carried out the repair and improvement of buildings and facilities that were identified as urgently necessary for the Foundation's operations and the care of the children. The improvements have focused on creating a safe, appropriate, and functional environment that supports the children's daily living, learning, and development.

The financial support from HeadStart International School Chaofah City Campus has played an important role in enabling the Foundation to carry out improvements to the buildings, essential utility systems, bedrooms, bathrooms, activity areas, and other facilities necessary for the care of the children. For some parts of the improvement work, the Foundation combined the funding from this project with contributions from other funding sources in order to address a wider range of needs and maximize the benefits for the children.

Life Home Project Foundation would like to express our sincere gratitude to HeadStart International School Chaofah City Campus, all staff members, parents, and students for your kindness, care, and generous support. Your contribution has not only helped improve our buildings and facilities, but has also played an important role in creating a safe, warm, and suitable environment where the children can live, learn, and grow.

Every contribution we receive is an important source of support that enables the Foundation to continue its operations and provide ongoing care and assistance to vulnerable children. It also helps create opportunities for the children to grow and develop in a safe and supportive environment.

Life Home Project Foundation sincerely appreciates everyone's contribution and for being part of our efforts to care for the children and create a place where they can experience safety, warmth, and opportunities for a better future.

With our sincere appreciation and gratitude,

Mr. Noppadol Pongpan / Manager
Life Home Project Foundation
